Inspiring Educational Leaders

Being A Global Digital Citizen

Carl Sagan once said that our society is deserving of citizens with an acute awareness of how their world works, and that is more necessary than ever in today's interconnected world. InfoWhelm and the exponential growth of technology has permeated every facet of our lives. Seemingly overnight, schools have become flooded with a myriad of digital devices at a rate which has exceeded our capacity to develop policy. Acceptable Use Agreements are under constant revision and in some cases have swelled to the size of a novel to detail all the ways the latest device can and cannot be used. Other schools attempt to limit or completely ban these devices.

We are missing an enormous opportunity. An opportunity to connect with our learners and cultivate responsible, ethical Global Digital Citizens.

For this session, we have distilled our successes with clients around the world to a one day intensive transformation of policy to a Global Digital Citizenship Initiative.

You will learn:
- What the defining characteristics of the digital citizen are.
- The 6 primary tenets of effective digital citizenship.
- How students can develop a code of ethics that will help them learn mindsets of conscientious and responsible behaviour.
- How to ensure students safety and security in the online world.

Who is this course for?
- Principals • School Groups • IT Directors
- Those entering leadership roles
- System and Department Leaders

Why should you enrol?
- To develop an understanding of how technology usage can help cultivate Global Digital Citizens.
- To evaluate current technology policies and agreements.
- To create a system of accountability and personal responsibility for technology usage.
- To consider a strategic process for building capacity and buy-in for this shift.

2014 Dates
Adelaide - 10th February
Melbourne - 11th February
Sydney - 12th February

What will you receive?
- A face-to-face intensive workshop with Lee Crockett to evaluate and redevelop existing policies and acceptable use agreements.
- Access to resources to facilitate this process.

Collaboratively, we will:
- Evaluate existing acceptable use policies and consider an alternative approach which shifts the burden of responsibility from the administration and teaching staff to the students.
- The application of this program progressively through all levels of school, with an appropriate escalation initiative for managing infractions.

This transparent and authentic program not only guide today's digital citizen in understanding appropriate behaviour, but also cultivate the principles of leadership, accountability, fiscal and personal responsibility, environmental awareness, and global citizenship. In Global Digital Citizenship, we take an in-depth look at the model citizen in the age of social networking and capitalize on the opportunity to use the technology ever-present in the lives of our students to cultivate Global Digital Citizens.

Workshop led by Lee Crockett
Lee Crockett is a national award winning designer, artist, author and international keynote speaker. He is the managing partner of the 21st Century Fluency Project, and is co-author of *Understanding the Digital Generation, The Digital Diet, Living on the Future Edge* and the best-seller *Literacy is not Enough.*
