

CREATING ON THE IPAD

MOVING BEYOND SUBSTITUTION

Creating, Investigating & Communicating with ICTs on the iPad

Mobile devices like iPads, iPhones and iPods allow learning to take place in a range of contexts and environments. A huge range of apps are available to support students in their literacy needs...but how do we find the best apps and activities for our diverse students? This workshop will give you the answers!

We'll show you how to use the iPad to allow students to improve their literacy in creative and engaging ways.

Find out how to produce 'epubs', electronic books, and use other apps to create multimodal texts designed to be read on a mobile device. See how students can use them to create and share their stories, and document their learning, using their own text, drawings and pictures.

How can educators integrate technology into teaching and learning? The **SAMR Model** will provide you with a practical framework for the classroom - I'll show you how to **ensure your technology improves teaching and learning** and show you strategies for classroom management with mobile devices.

This workshop will support teachers to understand how they can help students **develop ICT Capabilities** in line with the **General Capabilities of the Australian Curriculum**, with a focus on **creating, investigating and communicating with ICT**. You will receive a certificate for your professional learning journal.

MULTIMODAL TEXTS

CREATE EPUBS

FILM MAKING

Workshop date: **Friday 4 October 2013, 9-3pm**
(6 hours QCT Professional Development recorded on participant certificate)

Cost: \$100 per person (Places strictly limited so book early! Booking close by 18 September)

To enroll email pvshaw@tpg.com.au

Venue: Resource Centre Cairns Catholic Diocese Office
Lake Street Cairns

Paul Shaw, Presenter

Paul is a respected ICT leader with more than 15 years experience working with teachers to add value to their classrooms practice. His expertise and wealth of knowledge was recognised by Apple in 2000 and he became one of their inaugural class of Distinguished Educators. Paul now leads workshops in a variety of areas including using the iPad for creative, 21st Century teaching and learning.
